Profile

Developer with hands-on experience in backend and full-stack application development using Java, Spring Boot, React, MySQL, and PostgreSQL. Skilled in developing REST APIs, implementing business logic, optimizing SQL queries, integrating external services, and working with database procedures and triggers. Also developed proof-of-concept microservices applications to explore inter-service communication, messaging, observability, security, and containerized deployments. Focused on building high-performance, maintainable, and reliable enterprise applications.

Technical Skills

Languages	:	Java, JavaScript
Frontend	:	React, Redux, RTK Query, Tailwind CSS
Backend	:	Spring Boot, REST APIs, Hibernate, JDBC, Servlets, JSP
Databases & Querying	:	MySQL, PostgreSQL, MongoDB, Redis
Messaging & Event Streaming	:	Apache Kafka, RabbitMQ
Observability	:	Prometheus, Grafana, Loki, Tempo, Zipkin
Containerization & Orchestration	:	Docker, Kubernetes
Tools	:	Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code

Experience

Infocareer Pvt Ltd June 2025 – Present
Chennai, India

Junior Developer (Promoted from Software Trainee) *January 2026 – Present*

- Developed and enhanced features for a **Learning Management System (LMS)** using Spring Boot, MySQL, and React.
- Integrated meeting management APIs for **Microsoft Teams, Zoom, and Google Meet**, storing meeting data and implementing frontend functionality to visualize and manage meetings within the application.
- Consolidated exam-related data from multiple sources into a centralized database table using SQL **Stored Procedures and Triggers**, while maintaining logs for data processing and changes.
- Reduced API response time by **40%** through SQL query optimization and database performance improvements.
- Analyzed and resolved application issues across backend and frontend modules, improving system reliability and ensuring **Smooth Delivery** of new features and enhancements.
- Restructured and enhanced a sales application by improving the **User Interface**, adding graphical data visualizations, and implementing multi-theme support.

Software Trainee *June 2025 – December 2025*

- Independently developed the complete backend for an internal lunch subscription application using **Java, Spring Boot, and MySQL.**
- Developed User Interface using **React and Tailwind CSS**, creating responsive and user-friendly interfaces and integrating them with backend APIs.
- Designed and implemented core **Business Logic** for employee subscriptions, attendance, monthly cost calculations, and payroll processing.
- Implemented **JWT-based authentication and Role-Based Access Control (RBAC)** to secure APIs and enforce permissions based on assigned roles.
- Integrated employee and holiday data from another internal enterprise system to enable **Data Synchronization** across applications.

Projects

TastyTrack – Full-Stack Food Delivery Web Application | Github Link | Video Link

- **Role:** Full-Stack Developer
- **Technologies Used:** Java, JSP, Servlets, Hibernate, MySQL, HTML, CSS, JavaScript, VS Code
- Developed and integrated back-end and front-end components for seamless performance.
- Implemented responsive UI designs using HTML, CSS, JavaScript, and frameworks like ReactJS for optimal user experience.
- Developed robust server-side logic and database management using Java (JSP, Servlets, Hibernate) and MySQL.

Portfolio | Link

- **Role:** ReactJS Developer
- **Technologies Used:** ReactJS, TailwindCSS, Framer Motion, EmailJS
- Designed and developed a personal portfolio website using ReactJS to showcase projects and skills.
- Created dynamic animations to improve user interaction and experience.
- Utilized TailwindCSS for responsive design, ensuring optimal viewing on various devices.

Certifications

Java Spring Boot Microservices & eCommerce Project Masterclass | **Link** December 2025

Udemy

- Completed a hands-on course focused on building scalable microservices-based applications using Java and Spring Boot.
- Learned Microservices Architecture, Spring Cloud, REST APIs, Eureka Service Discovery, API Gateway, and inter-service communication.
- Worked with Apache Kafka and RabbitMQ for asynchronous and event-driven communication between microservices.
- Gained knowledge of distributed systems concepts including scalability, fault tolerance, monitoring, and microservices observability.
- Applied microservices concepts while developing and integrating services for an eCommerce application.

Java Full Stack Development | **Link** July 2024 – January 2025

TAP Academy, BTM Layout, Bengaluru

- Acquired in-depth knowledge of Core Java, Advanced Java, JDBC, J2EE, Servlets, Spring Boot, Hibernate, MySQL, and Frontend Development.
- Gained hands-on experience in OOP, Collections, Multithreading, Exception Handling, and Java 8 features including Lambda Expressions and Stream API.
- Applied full-stack development skills in projects, including the TastyTrack Online Food Delivery application.

Education

Kongunadu College of Engineering and Technology 2020 - 2024

Bachelor of Engineering in Electrical and Electronics Engineering

Government Higher Secondary School 2019 - 2020

State Board in Bio Maths

Government High School 2017 - 2018

State Board
